

How to Install Citrix Workspace

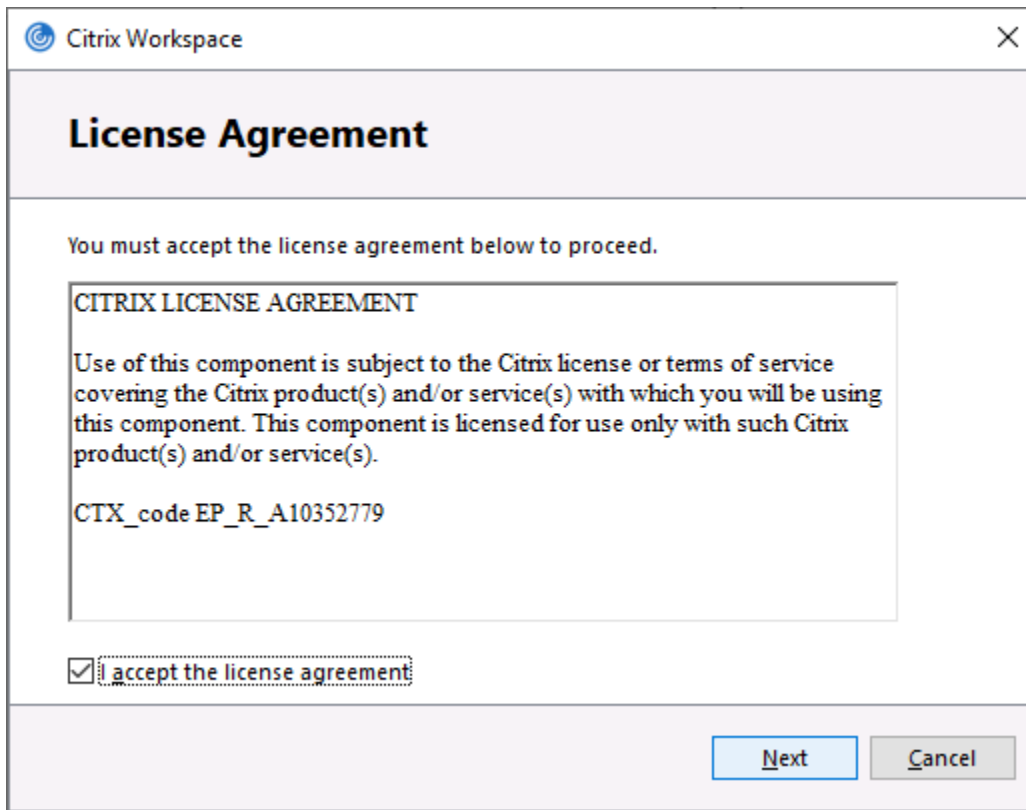

Download Citrix Workspace App for Windows.

Once downloaded, launch the install.

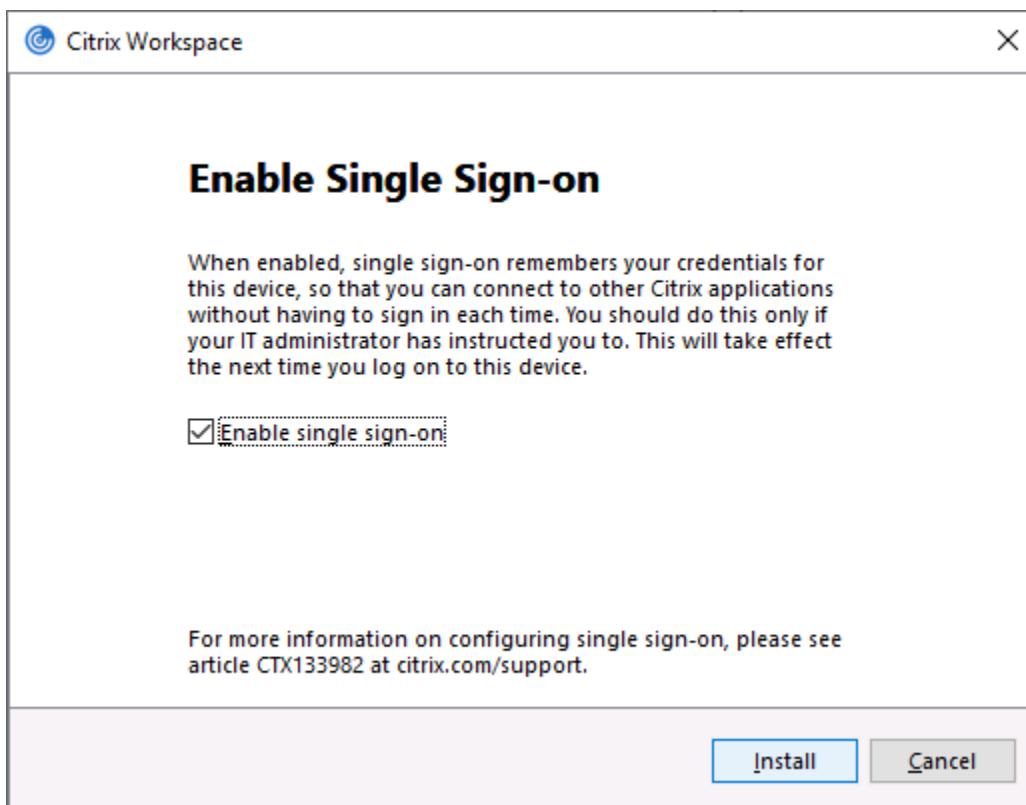

Click Start

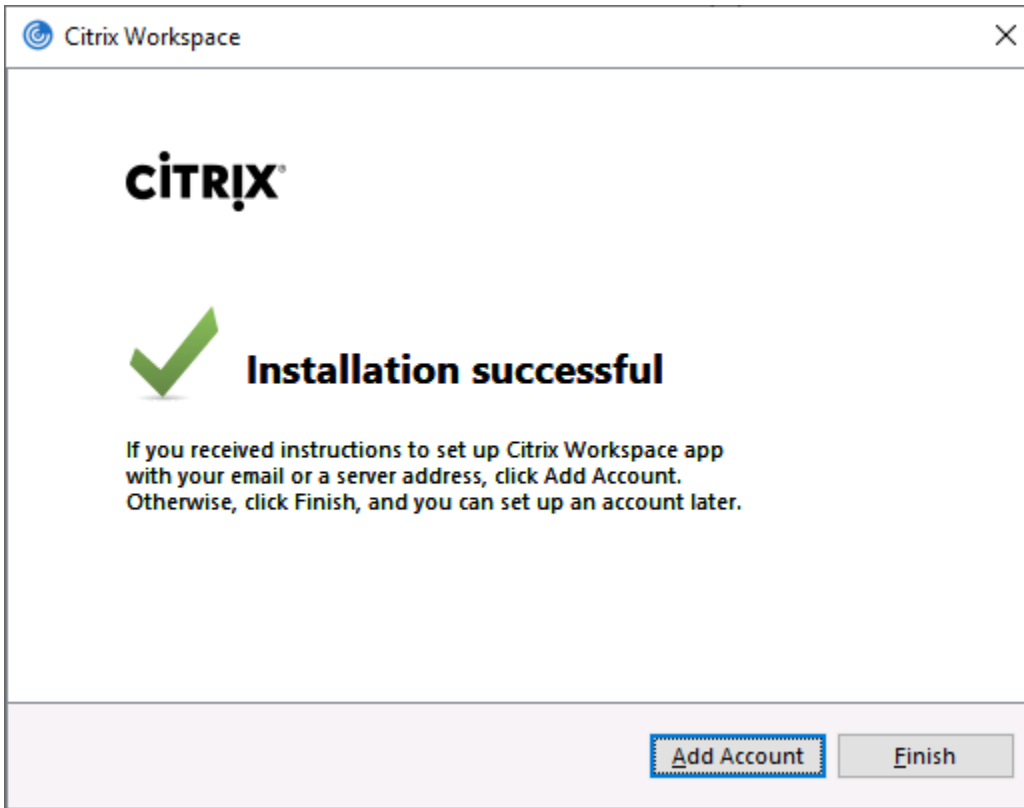

Accept the license agreement

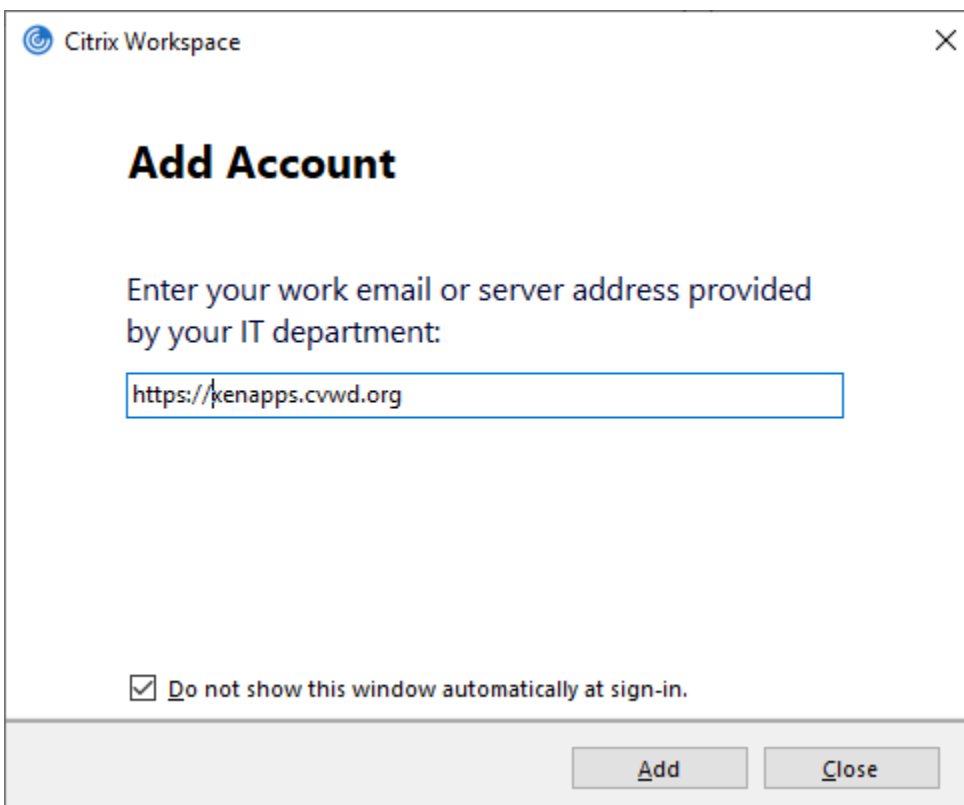

Enable Single Sign-on

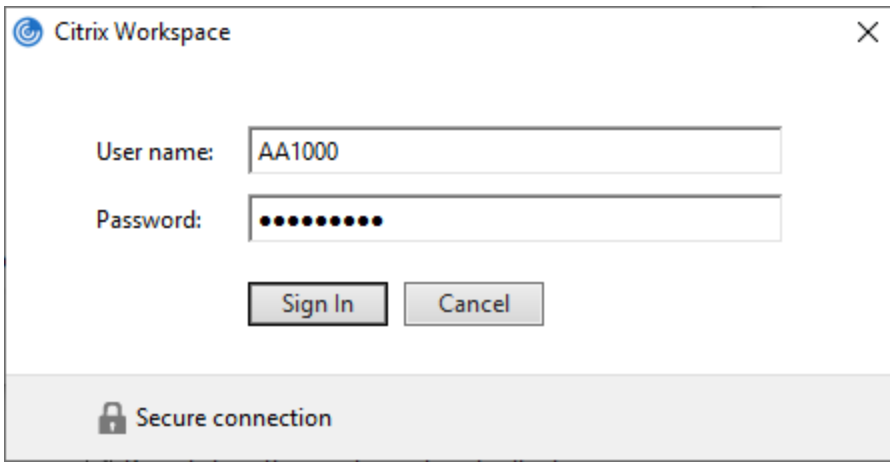

Once the installation finishes, add account

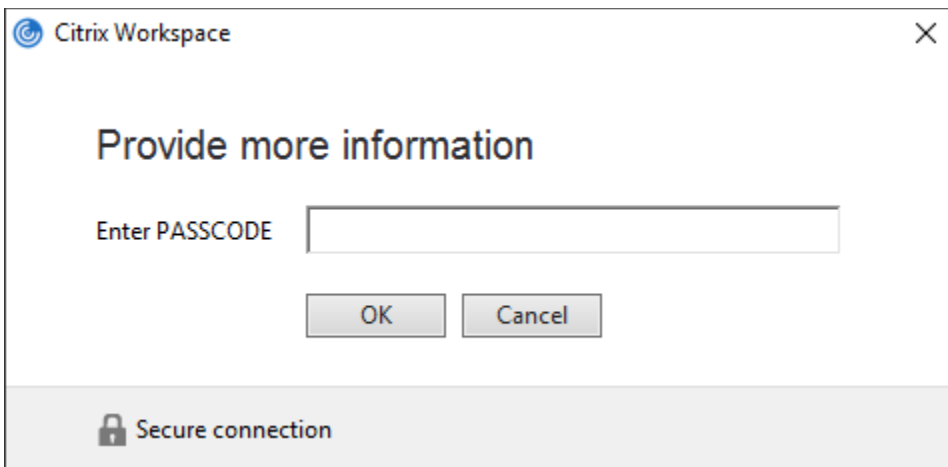

Add <https://xenapps.cvwd.org> and select Do not Show this window

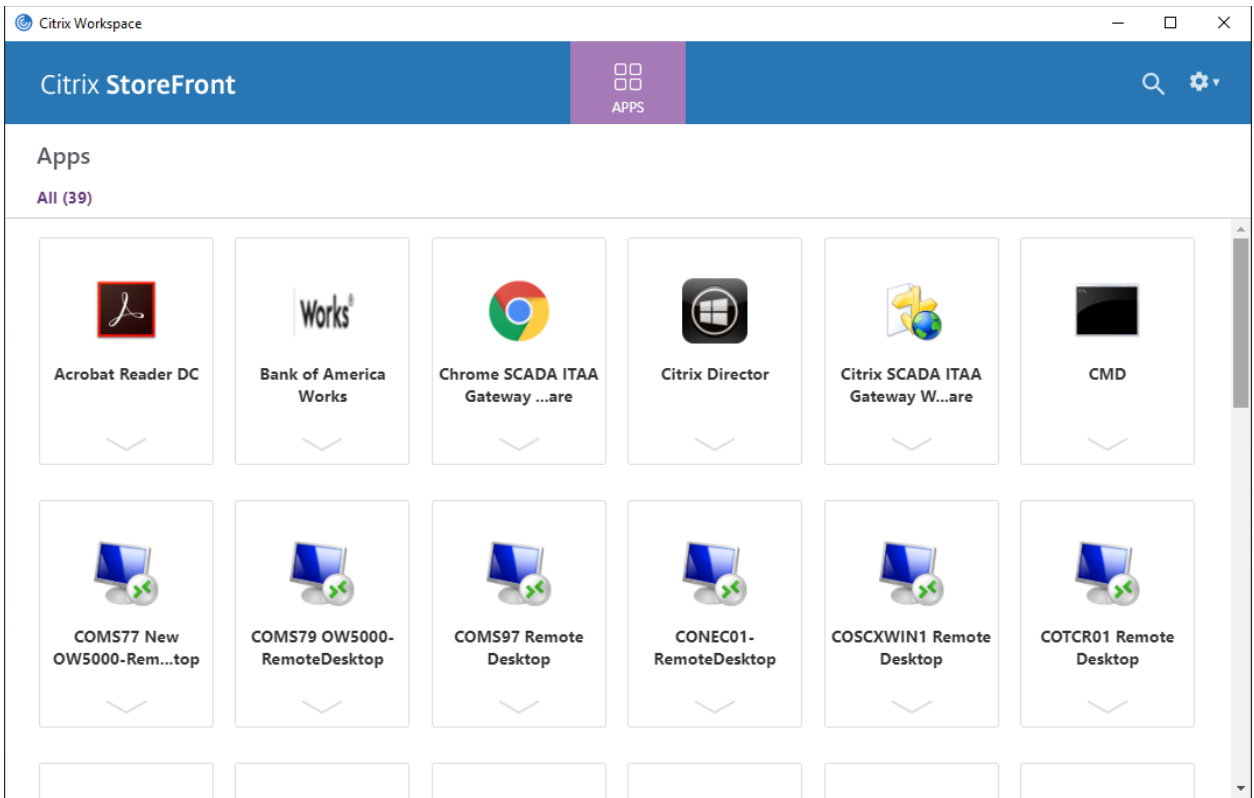

You will be prompted to enter your credentials, enter your user ID (initials and employee number) and password

Enter the code that was sent via text message for two factor authentication

After entering the code you were texted, it will launch Citrix Workspace and you will have access to your apps. Double click any app to launch. The apps will launch and look like they are running locally.

Once Citrix Workspace is installed, you can launch the Storefront by doubling clicking or right clicking on the Workspace icon in the system tray.
